

## 2022 - Corporate Member Registration Information

January 11<sup>th</sup>, 2022

We would like to express our sincere gratitude to all of our members for your continued support of Peace and Nature's activities and for your registration as corporate members. In 2008, we started growing rice and vegetables without using pesticides in OZO-cho, Kita-ku, Kobe City. The SDGs Action Program, which is in line with the goals of the SDGs, is also very popular. The SDGs Action Program, which is in line with the goals of the SDGs, has been very well received by the international community, with students from universities, corporate training programs, and international schools participating in the on-site experience program. The number of participants as well as supporters of the program has been steadily increasing as a result of many people continuing to experience the program in nature. In particular, the occurrence of Covid-19 has greatly changed people's awareness of the environment and health around the world. In the global society of the future, the key word is for companies, universities, schools, and local governments to work together as one. By increasing the number of people who are conscious of the global environment, we will expand our circle of activities and strengthen our ability to communicate our activities bilingually (in Japanese and English) from Japan to the world. Therefore, we would like to inform you that we will be changing the type of our corporation from 2022. We would like to thank you for your understanding.
